

# LUXURY FOR OUTDOORS

*Let yourself be seduced by Element4*

# DISCOVER THE AMBIANCE OF OUR OUTDOOR FIRES!

**Are you looking for an elegant outdoor fireplace with which you can comfortably sit outside at any time? Do you want to enjoy the ultimate source of ambiance on your terrace or balcony? Then choose the Outdoor Fires from Element4. An outdoor fireplace made in the Netherlands, created by design enthusiasts and real bon vivants, just like you...**

*A fireplace that fits you  
perfectly*

You are someone who enjoys sultry summer evenings and wants to take advantage of them as long as possible. That's why you are looking for a stylish outdoor fireplace that not only offers warmth, but also looks great. The Outdoor Fireplaces of Element4 are the right choice for you. These stylish outdoor fireplaces look like a normal gas fire and are designed with a passion for design, knowledge of the latest trends and love for special products. This is reflected in the final result: a special fireplace that makes the difference between a "normal outdoor fireplace" or an "ultimate atmosphere maker."

## **DUTCH COMMON SENSE WITH GLOBAL ALLURE**

Element4 is a top Dutch brand. We work practically and pragmatically, but with a strong focus on design. This ensures that our fireplaces are loved around the world by designers, architects and trend-conscious consumers. As real 'Dutchies', technology is an important issue for us. Our fireplaces have the most advanced technical features: they are efficient, can be operated remotely and have a flame picture which is completely controllable. This makes us a real trendsetter on the international market.

# BURNERS

Next to the outdoor fireplace of your choice it is always indicated which type of burner the fireplace has. These burners differ greatly from each other, but at the same time have one important similarity: they are equipped with beautiful glowing logs as standard. With this you can enjoy the most beautiful fire at a low setting!

*Enjoy the most beautiful fire at a low setting!*

## LED BURNER

With its unique combination of LED lighting and fire, the Ledburner© provides an intense experience. With over 7 different colour settings, you can determine the desired ambiance yourself.

## DOUBLE BURNER

The double burner guarantees a beautiful fire experience because the fire is spread over the entire fireplace. In addition, you can easily switch off one of the burners for optimum control of the heat and the flame picture.

## QUAD BURNER

The Quad Burner features five different burners. This way you can endlessly adjust the flames and the heat intensity. Thanks to the large number of burners it is possible to create warmth in a short amount of time. At the same time you can enjoy an impressive fire display. Switching to a low setting? Then simply turn off some of the burners by pushing a single button.

WE PROUDLY PRESENT TO YOU:

# THE MOST BEAUTIFUL FIRE AT A LOW SETTING

At Element4 we see it as a challenge to get the most out of our fireplaces. Our aim? Creating a lovely ambiance with a flame picture, regardless of the power on which the gas fireplace is running. This applies to our regular gas fireplaces, but also to our Outdoor Fires. Now you can enjoy a beautiful fire, even with the lowest possible gas consumption. It is no coincidence that we dare to say that a gas fireplace from Element4 "has the best fire on a low setting".

ELEMENT4 | *Installation depth*

## SAVE ROOM THANKS TO MINIMAL INSTALLATION DEPTH

Do you have limited space available in your lounge corner or covered terrace? Do you want a gas fireplace that is as flat as possible in your garden from a design point of view? Then an outdoor fireplace from Element4 is the right choice for you. Our Outdoor Fires are feasible with an installation depth of only 25 cm. This is ideal if you have a small terrace or if you also want to install a fireplace mantel. Moreover, many designers and architects opt for our shallow fireplaces because of the spatial effect.

# DIGITAL

PRO CONTROL

Want to easily control your gas fireplace with your Smartphone or Tablet? It is possible with ProControl from Element4. ProControl is the perfect choice if you want to control your fireplace remotely, without the use of a home automation system. All you need is the supplied Element4 Wi-Fi box. The rest is already present in your fireplace and in the user-friendly ProControl app that you install on your smartphone or tablet. It could not be easier!

DOMOTICA

Do you want to control your Element4 gas fire with your existing home automation system? It's possible! Using domotics you can switch the gas fire on and off, turn it up or down and control the double burner. The installation is simple: you connect an Element4 home automation cable to the receiver of your gas fireplace and connect it to your home automation system. The rest speaks for itself. And if you cannot get it to work, your nearest dealer is always there to help you.

# BACKWALLS

Element4 offers you the possibility to completely match the back wall of your outdoor fireplace to the style of your garden or balcony. Choose from a back wall in black steel to black glass or roof tile motif. You decide for yourself.

The choices vary according to the type of fireplace, so check carefully which back wall is available for your fireplace.

We offer the following styles and designs:

BLACK STEEL

BLACK GLASS

ROOF TILE MOTIF

*Choose your own style*

## FUEL BED

Your Element4 gas fireplace comes standard with gas logs. These realistic gas logs consist of smaller and larger branches made of ceramic, which are specially made for use in the gas fireplace. You can also choose other materials such as: white carrara pebbles, white stones or grey stones. These materials also have a special composition, so that they are suitable for long-term use as fuel bed.

The choices vary depending on the type of fireplace, so check carefully which type of fuel bed is available for your fireplace

GAS LOGS

WHITE CARRARA PEBBLES

WHITE STONES

GREY STONES

*Choose your own style*

DIAMONDS

# ANTI-REFLECTIVE GLASS

Want to enjoy an even more beautiful flame picture? Want to feel like you are looking straight into the fire? Have your outdoor fireplace equipped with anti-reflective glass. This glass prevents annoying glare from incident light rays and is virtually invisible. Even when the outdoor fireplace is turned off, you cannot see the glass. This allows you to benefit from the best of both worlds: the convenience and comfort of a closed outdoor fireplace, with the atmosphere and flames of a real fireplace.

View the technical overview on page 32 for a view of the fireplaces that can be used with anti-reflective glass.

# YOUR FIRE IS COMPLETE WITH THE RIGHT ACCESSORIES

## 1 SERVICE HATCH

Do you have a gas fireplace without a frame? Then you need a service hatch for mounting the gas control block. The service hatch has an installation size of 250 mm x 175 mm (H x W) and is designed to be sleek and stylish. This way you are assured of an optimal match with your chimney breast .

## 2 WALL SWITCH

With a stylish switch on the wall, you can easily switch your gas fire on or off. You can also control the temperature with a touch of a button. It's a simple solution, that is very easy to use.

## 3 REMOTE CONTROL

Our remote control features the E-Save control system. This allows you to switch the fireplace on and off remotely and to select different burner and temperature settings. Thus you save at least 40% on gas.

## 4 VENTILATION GRILL

It is important that the chimney breast of your gas fireplace is well ventilated. You do this by placing ventilation grills on the sides of the chimney breast . This prevents high temperatures in the chimney breast and any cracks in the stucco. In addition, you benefit from optimal heat dissipation. The ventilation grill has an installation dimension of 231 mm x 43 mm (H x W) and has a high level of finish.

# PRODUCTS

*Looking for a contemporary and stylish gas fireplace that highlights your interior?*

Discover our versatile gas fireplace collection. From front-view and see-through fireplaces to room dividers or 3-sided fireplaces; the balanced flue fireplaces from Element4 guarantee optimum ease of use and a beautiful design. Our gas fireplaces are easy to maintain and have a small installation depth of just 25 centimeters. This way you also save valuable space. In addition, with an Element4 gas fireplace you can benefit from the most beautiful fire at a low setting.
