CREATING THE PERFECT ELEVATOR

When it comes to creating a consistent look and feel throughout your building, elevators play a key role. By freely combining KONE's flexible and versatile selection of materials and accessories, you can create an elevator interior that matches your building's design perfectly.

HOW TO CREATE YOUR CUSTOM ELEVATOR DESIGN

1 Choose the combination of wall, floor, and door material

Our wide range of available choices ensures that you can find the perfect combination to match your building's design, budget, and intended use requirements. For example, if durability and comfort are important, stone flooring is long-lasting and maintains its appearance even under heavy use, while colored or wood laminate wall finishes help to create a warm ambience inside the car. For a more exclusive look and feel, our new patterned steel and 3D glass finishes can really make your elevator stand out.

2 Select your ceiling design

KONE offers a wide range of different ceiling designs, equipped with modern and innovative lighting solutions that help create just the right atmosphere inside the elevator. Our ceilings are designed to give the best possible lighting quality while avoiding glare, ensuring every elevator trip is a pleasant and safe one. KONE's lighting solutions are also energy efficient – our LED lights use 80% less energy than traditional halogen lights.

3 Choose your accessories

Our accessories are designed to increase convenience for passengers, and include options such as handrails, seats, car operating panels, information screens, and tenant directories. KONE accessories have been designed to meet the specific requirements of different users and building types. For example, we offer special graphics designed for car operating panels in senior housing and children's hospitals, as well as customizable solutions for office, hotel, and retail environments.

MATERIALS AND ACCESSORIES FOR ALL PURPOSES

This catalog presents our complete selection of elevator car interior materials and accessories. The options are grouped into two categories: standard and premium. Premium materials and accessories have been created using exclusive materials and components and are designated with **P**.

Each carefully selected item has been designed to be both visually appealing and functional. The collection also contains several accessories that fulfill elevator accessibility and vandal codes.

The materials and accessories presented in this catalog are available for KONE MonoSpace® 500, KONE MonoSpace® 700, KONE MiniSpace™, KONE ReFresh™ 200 and KONE ReFresh™ 800.

For more design inspiration, take a look at the KONE Design Collection car interiors and create your own design with the KONE Car Designer tool: www.kone.XX/XXXX. Consult your KONE sales contact to discuss your final interior selection and for any additional information and support.

SELECTABLE CAR ELEMENTS

reddot design award
honourable mention 2012

KONE's new, award-winning horizontal wall panel design is visually appealing and creates a spacious feeling inside the elevator cab.

Wall panel configuration

- All materials are available with vertical 2-panel per wall and horizontal 4-panel per wall designs for KONE MonoSpace® 500, KONE MonoSpace® 700, KONE MiniSpace™, and KONE ReFresh™ 800.
- KONE ReFresh™ 200 will feature vertical 1-panel rear wall design. Side wall panel configuration will vary depending on car depth.
- **Material scaling & variability**
- Patterned images not to scale. Consult your sales representative for Car Designer Tool and samples.
- Real wood laminates are made of natural materials so variation will occur.
