

Brakel® Estra

Transparent louver ventilator

The Estra is a transparent louver system which is fitted vertically, and is suitable for both daily ventilation and smoke & heat extraction. The Estra's aesthetic and sleek design means that it really comes into its own in projects featuring substantial amounts of glass. The Estra has thermally separated profile sections, and is available with either single or double glazing. The choice of louvers available includes point-fixed, circumferentially framed and (semi-)structural glazing. Fields of application: atriums, shopping centres, industrial buildings and offices.

Green Building Products

As a leading partner in its field, Brakel endeavours to remain a forerunner in the area of corporate social responsibility. Given that with our products, we let in the best that nature has to offer, it is only natural that we also care greatly for the environment. We therefore seek to integrate sustainable solutions in our working methods, products and services, wherever possible.

We have categorised our highly extensive product range according to the levels of sustainability and comfort applicable. The many energy efficient products and systems in the range can be recognised by the butterfly icons that they bear.

We classify our products, ranging from functional to sustainable, as follows:

functionally applicable in accordance with current qualifications / standards

compliant with raised sustainability requirements

compliant with high sustainability requirements

entirely in keeping with a sustainable solution

Estra

The Estra is a transparent louver system which is fitted vertically, and is suitable for both daily ventilation and smoke & heat extraction. The entire Estra range is both functional and sustainable, while it has an aesthetic yet and sleek appearance.

Single glass center pivoted

Estra EG

Sustainability:

- Single toughened glass thickness 6 / 8 / 10 / 12 mm
Optional laminated glass 12 mm
- Center pivoted
- Overlapping
- Max. width per element:
 - 1500 mm (6 / 8 / 10 mm)
 - 1650 mm (12 mm)
- EN 12101-2 certified

Single glass point-fixed

Estra EG Point-Fix

Sustainability:

- Single toughened / laminated glass thickness 12 mm
- Center pivoted
- Overlapping / Flush connection
- Max. width per element: 1650 mm

Single glass top hinge

Estra EG Top

Sustainability:

- Single toughened / laminated glass thickness 10 / 12 mm
- Top hinge
- Overlapping / Flush connection
- Max. width per element: 1200 mm

Double glazed Center pivoted framed

Estra TG

Sustainability:   

- Thermally separated
- Double glazing thickness 24 mm
Optional thickness 30 mm
- Center pivoted
- Flush connection
- Circumferentially framed
- Also available Iso sandwich panel model
- Max. width per element:
1600 mm (24 mm)
Optional 1800 mm (30 mm)
- EN 12101-2 certified

Double glazed Center pivoted (semi-)structural

Estra TG Semi-Structural/TG Structural

Sustainability:   

- Thermally separated
- Double glazing in case of semi-structural thickness 30 / 40 mm
Double glazing in case of structural thickness dependent on thickness of structural glazing
- Center pivoted
- Flush connection
- Fully or semi-structural
- Max. width per element:
1800 mm
- EN 12101-2 certified (applies solely to fully structural model)

Double glazed top hinge

Estra TG Top

Sustainability:   

- Thermally separated
- Double glazing thickness 32-40 mm
- Top hinge
- Flush connection
- Circumferentially framed / fully or semi-structural
- Max. width per element:
 - 1200 mm (semi-)structural
 - 1700 mm circumferentially framed
- EN 12101-2 certified (applies solely to fully and semi-structural models)

Double glazed top hinge for roof installation

Estra TG Roof

Sustainability:   

- Installed in sloping roof 5°-75°
- Thermally separated
- Double glazing thickness 32-40 mm
- Top hinge
- Flush connection
- Structural
- Max. width per element: 1400 mm
